### NEW OFFERINGS

### MITEK'S BUILDERMT

Our core goal is to engage home builders in every step of the process of home building, all the way from Drafting, to Prospect Management (CRM) to Warranty Management and Closings. Our engagement starts with creation of the Plan/CAD File. Whether in 2D/CAD or 3D-BIM, we harvest accurate lot-specific Bills of Material, which feed equally accurate purchase orders.

We also offer award-winning website functionality that allow intuitive interaction with prospects and customers, as well as cloud-based field management tools for Superintendents and Trades that offer: Scheduling, Field VPO's, and real time Collaboration. Executive reporting tools offer dashboard displays of the true analytics that drive a builder's business.
